Tier-based discount caps turn Inside Sales profitable

Applied to 2022–2025 orders, caps would have lifted net contribution nearly 5×, to an estimated $115,258

Challenge

More than 1 in 3 Inside Sales accounts lose money

Losses outweigh the +$2,792 earned by the other 226 accounts, leaving the whole tier at −$16,822.

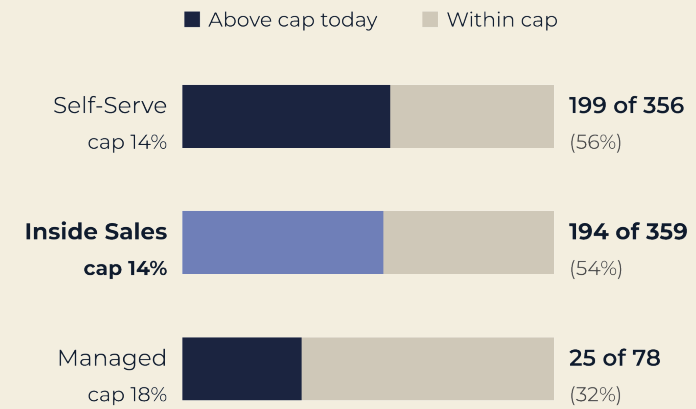

133
of 359 accounts (37%) have negative net contribution

−$147
average loss per account, −$19,614 total

Solution

Recommendation: Cap discounts by service tier

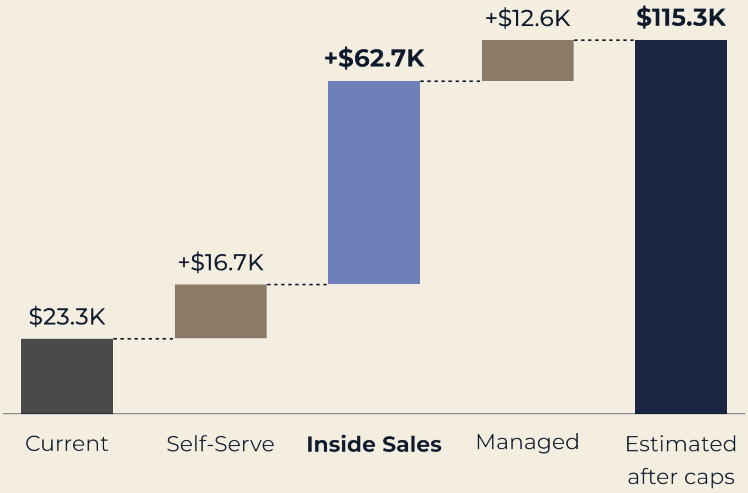

Next step: approve caps for FY2026, starting with an Inside Sales pilot and tracking order volume monthly.
Caps would lower discounts for 418 of 793 accounts (53%); if volume drops, the gain shrinks.

Sales Impact

Inside Sales would drive 68% of the $92K gain

Net contribution by tier, current to estimated after caps.

Key Metrics Impact

All key metrics would improve

Projected change in percentage points after discount caps

Prepared For

Marcus Reyes, VP of Sales, Southwest Office Solutions

Data Analyzed

- Account-level analysis of 793 accounts, Jan 2022–Dec 2025; five records excluded for missing key data.
- Company targets: 15% gross margin; $500+ net contribution per managed account (2022–2025).
- Service policy supplied by client's Finance department.
